

A Cryptocurrency designed for business and entertainment

ubecoin

a smarter way to trade

UBE Limited's Mission

To give power back to the merchants.

UBE Limited's Vision

To disrupt the traditional barter model globally by transforming it into a community based, decentralized subscription model.

A superior tool for growing your Global Business

UbeCoin will be used as a medium of exchange from Business to Business (B2B), Business to Consumer (B2C) and Consumer to Business (C2B).

Free Trade Barter

A 100% owned subsidiary of UBE Limited which will offer a complete Global business directory of merchants who accept Ubecoin as a method of payment. With enhanced geolocation search functionality and direct communication, you will always be able to find a merchant no matter where you are in the world. Join Today! Subscriptions for the first 20,000 merchants are free!

Zero Cash Transaction Fees Ever

On average existing barter platform businesses charge cash fees of 10-13% on each buy/sell transaction.

Traditional barter platforms often require joining fees, advertising fees, non-trade fees and lock-in contracts. These fees cut into your profit margin and drastically diminish the advantage of using barter and a means to grow your business.

Ubecoin and Free Trade Barter are 100% cash transaction-fee free. A single annual subscription grants access to the Free Trade Barter network with unlimited advertising capacity saving you time and money when calculating your expenses.

Website Security

UBE Limited & Free Trade Barter websites utilise EV SSL certification "green bar" security. "EV" stands for Extended Validation. Extended Validation SSL Certificates are a new type of SSL Certificate which is intended to give users more confidence with whom they are transacting. UBE Limited & Free Trade Barter control and own the web sites.

Security conscious online shoppers prefer to transact on websites protected with an EV certificate, according to a 2015 Consumer Trust Survey published by the CA Security Council.

Security and Accountability

There are thousands of cryptocurrencies, with more being created every day, and they exist in a market which is volatile and unregulated. UBE Limited is created by experts from around the world in cryptocurrencies, finance and business management. As a good corporate citizen UBE limited is committed to the highest standards of Corporate Governance and Corporate Responsibility, with transparent, measurable and accountable processes and procedures being its core tenets.

Additionally, Ubecoin is ERC20 token standard compliant, meaning it can be stored in any ERC20 compliant wallet.

ERC20 Compliant and the Ethereum Architecture

Ubecoin has the advantage of leveraging Ethereum's highly established blockchain network.

This means that Ubecoin will be updated with the most advanced security features and will always be on the cutting edge of cryptocurrency technology. Ubecoin is ERC20 compliant which brings uniformity, reduced complexity and enhanced compatibility. This means the existing consumer base of people who hold approved ERC20 wallets will have instant opportunity to participate in the Ubecoin ecosystem.

Token Model

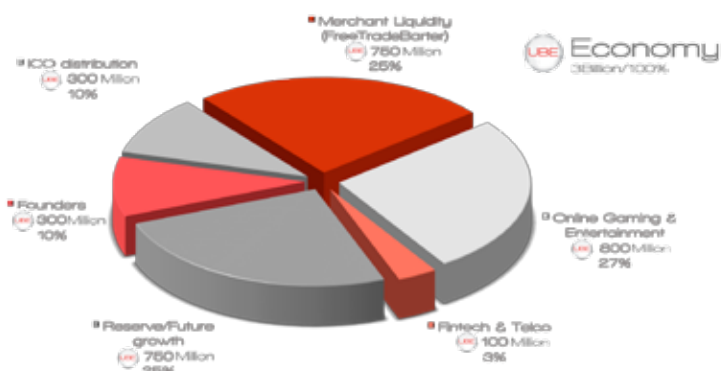

UBE Limited has pre-mined 90% of the total utility token allocation for the furtherance of its business activities both now and for the future. As part of our advanced security protocols, only a relatively small number of tokens will be held in multiple "hot" wallets at any one time to disseminate amongst our networks or provide liquidity within the marketplace.

A combination of cold storage techniques will be applied along with real world physical security measures to insure the safe keeping and protection of the digital asset.

Token Distribution

Ubecoin utility tokens will be used for all platform actions, including payment for goods & services, trading and promotions. Anticipated launch date onto the crypto currency exchanges will be shortly after the TGE closes.

- TGE will release of 300 million UBE tokens at USD 0.25
- Early Contribution 40% Bonus or USD 0.15 from 2 June 2018 to 1 August 2018
- First Release 20% Bonus or USD 0.20 from 2 August 2018 to 1 September 2018
- Second Release 10% Bonus or USD 0.225 from 2 September 2018 to 1 October 2018
- Third Release USD 0.25 from 2 October 2018 to 1 November 2018

Use of Funds

UBE Limited's TGE will be conducted to raise funds to execute its strategies and implement its initial Vision of creating a global bartering blockchain platform which will provide merchants with a low cost transparent interactive subscription based economy, and further UBE Limited's multi-jurisdictional global objectives.

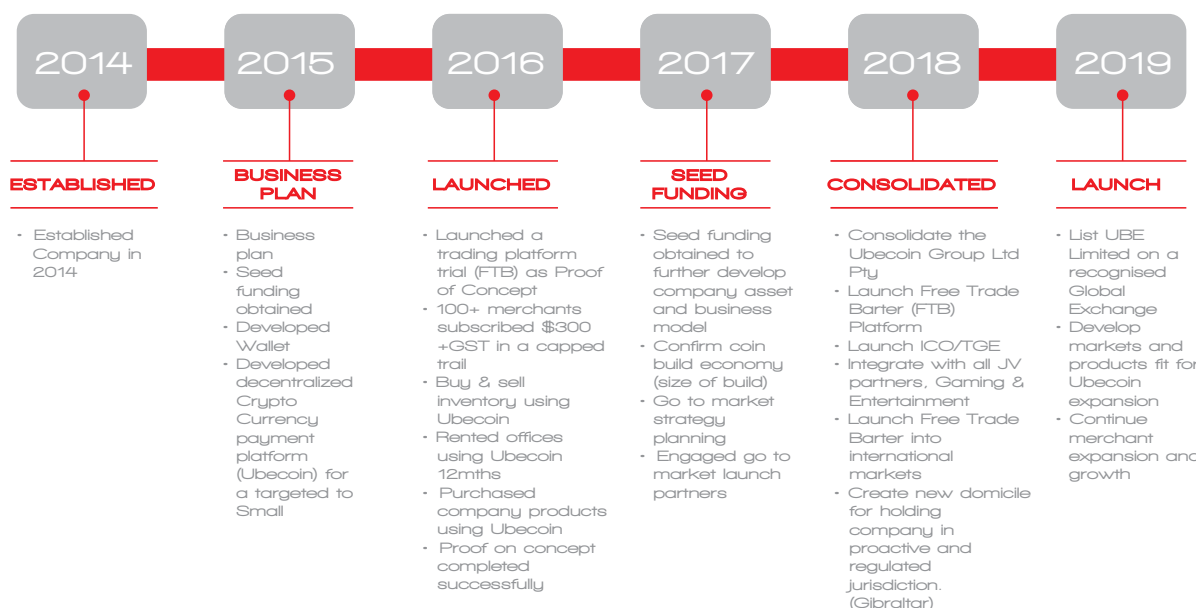

UBE Limited's strategy to increase market share within the barter industry is via strategic mergers, acquisitions, partnerships and strategic alliances.

This will create consolidation, increase market share and broaden the customer base by migrating merchants from the incumbent barter model onto the FTB subscription base model.

Business Goals & Timeline

We've taken our time to get our crypto right. A stable infrastructure and solid financial backing. But more importantly, a marketplace of legitimate businesses who accept Ubecoin. So you can actually spend it. No longer is crypto just for speculators.

Our Amazing Partners

The more merchants and consumers that join the network, the greater the liquidity of the Ubecoin market. This will create a greater the diversification of goods and services that will be offered.

The trade of goods and services will establish the value of Ubecoin and will drive its market capitalisation.

By on-boarding small to medium business and the online entertainment sector into the Ubecoin ecosystem, Ubecoin will instantly create an uplift in consumer to business transactions and provide multiple avenues for gamers to spend their Ubecoin.
